IN SITU FREEZE DRYER FDR29-60C

The Electric heating in situ freeze dryer with electric heating function can be freeze dried in situ. It changes the complex operation and prevent sample pollution, and make drying automation. Used in Medicine, Pharmaceuticals, Biological research, chemicals, food. Also known as Pilot lyophilization machine.

FDR29-60C IN SITU FREEZE DRYER

Pre-freeze-drying integrated LCD display, PID control, with freeze-drying curve Square stainless steel material tray, easy to operate and clean, Configurable inflation valve, one-time dry inert gas Vacuum sealing, liquid crystal display partition temperature, cold trap curve Shuangjia PLC controller supports 20 programs, and each program can be divided into 40 segments of programming Freeze-drying program parameters can be modified during operation, and record the final drying curve Optional USB connection function, export curve data to U disk Optional computer remote connection function Optional manual capping device

4 freeze-dried bottles are optional

SPECIFICATIONS

| Model | FDR29-60C |
|------------------------------|---------------------------------------|
| Туре | Electric heating in situ freeze dryer |
| Lowest condenser temperature | -50°C |
| Drying area | 0.1 m ² |
| Tray temperature | -50°C to +60°C |
| Trays load capacity | 1.5L |
