

# LOW TEMPERATURE KINEMATIC VISCOMETER PTL12-02

# LOW TEMPERATURE KINEMATIC VISCOMETER

## PTL12-02

Viscosity of an oil is defined as its resistance to flow and Viscometer measures the flow. Monitoring viscosity is one of the most important components of any oil analysis program. Minute changes in viscosity at operating temperatures can be magnified to the extent that an oil is no longer able to provide adequate lubrication and efficiency in preventing friction between moving parts.

Used in Petroleum Industry, Oil and Gas Industry.

## PTL12-02 LOW TEMPERATURE KINEMATIC VISCOMETER

2 working units, Dewar low temperature bath with lighting. Safety protection device can prevent over-low liquid level.

Product Image Coming Soon

### SPECIFICATIONS

Model	PTL12-02
Working units	2
Temperature controlling range	50 – 40 °C ± 0.1 °C
Refrigerated by	Shock absorption air compressor, Fluorine free
Safety	Device can prevent over-low liquid level
